PROFESSIONAL SUMMARY

Full Stack ERP Developer with 8+ years designing, building, and integrating enterprise systems end to end — from database and API architecture to responsive front-end delivery. Proficient across ASP.NET Core, PHP, JavaScript and SAP UI5. And also working knowledge of React and Angular, with deep expertise in REST/OData APIs, middleware integration, and cross-platform automation (SAP, biometric devices, third-party systems, OAuth2, JWT). Skilled at translating complex business processes into scalable modules, real-time dashboards, and automated document/reporting pipelines. Combines strong technical ownership with client-facing experience in requirement analysis, solution demos, and project leadership — consistently delivering systems that reduce manual effort and improve operational visibility.

AREAS OF EXPERTISE

- ERP system development, customisation and module engineering
- ERP integration, middleware architecture and API driven workflows
- Business Analysis, ERP, Digital Transformation, or Systems Implementation
- knowledge of business process analysis & workflow design
- Designed and developed a full-stack web application using ASP.NET Core, ASP.NET MVC, React, Angular, Entity Framework Core, MySQL, Razor Views, and Bootstrap, following a RESTful API architecture with JWT token authentication and role-based access control (Personal Project).
- Architect and implement Microservices
- Centralizing ERP and E-commerce website.
- Biometric attendance and real time data synchronisation
- Reporting, dashboards, document automation and print ready outputs
- Client engagement, requirement gathering, project leadership and post-delivery support
- Cross platform full stack delivery covering frontend, backend, database and DevOps
- Strong knowledge of business process analysis and workflow optimization.
- Experience implementing inventory and warehouse management processes.
- Good understanding of accounting principles and ERP finance modules.
- Experience with ERP data migration projects.
- AI Assistant Chat Screen integration (groq)
- **Built AI Model using python and implemented in React, Flask:** Land price prediction model (ML Model: RandomForest)

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, TypeScript, C#, C, C++, VB.NET(working knowledge), Go (Golang), Python(basic proficiency)

Web and Markup: HTML, CSS, XML

Frameworks and Libraries: SAP UI5, jQuery, Laravel(working knowledge), React.js, ASP.NET, ASP.NET Core, Angular, Django(basic proficiency), Blazor, MudBlazor(working knowledge)

Runtime, Engines and Platforms: Node.js, Unity3D (5.4.1f1, 5.5.0f3), Windows, macOS, Android, iOS

Databases: MySQL, Oracle, MongoDB, Microsoft SQL Server

DevOps and Tooling: Docker, Jenkins (CI / CD basics), Postman, Swagger, WordPress

Version Control: Git, GitHub

Project Management: ClickUp, Redmine

Integrations and APIs: Biometric systems (eSSL BioTime, ZKTeco, Matrix Comsec COSEC), Google Analytics, Amazon SNS, push notifications, middleware architecture, ETL processes, third party software integration

ERP and Enterprise Technologies: SAP UI5, SAP Integration

API Development and Authentication: REST APIs, OData Web Services, Microservices, JWT Authentication, OAuth 2.0, robust PHP APIs, Azure Entra ID (formerly Azure AD), SOAP

Certifications: Basics of Exploratory Data Analysis (EDA), Introduction to Data Science (Great Learning)

WORK EXPERIENCE

Tranetech Software Solutions, Abu Dhabi, United Arab Emirates

Software Engineer, Full Stack ERP Developer

January 2018 to March 2026

- Developed fifteen plus custom ERP modules covering
 - **Human Resource Management System,**
 - **Finance/Accounting**
 - **Leasing Management**
 - **Procurement Management**
 - **Inventory/Store Management**
 - **Cleaning Management**
 - **Project Management (operations)**
 - **Customer Relationship Management (CRM),**
 - **Computer Aided Facility Management (CAFM),**
 - **Sales Management,**
 - **CAMP Management,**
 - **Recruitment and Training Management,**
 - **Employee Performance Evaluation,**
 - **Ticket Management and POS.**

- Developed .NET Web APIs for mobile applications and .NET Core, Web API, OData services for SAP UI5 integration including JWT token
- Built scalable web applications with SAP UI5 frontends, supported by PHP or OData Service backends.
- Feature Development & Maintenance: Building new application features while optimizing and maintaining existing codebases.
- Code Quality & Reviews: Enforcing industry standards by writing clean, efficient code and reviewing peers' pull requests to maintain high-quality deliverables. Ensures services are monitored adequately.
- Architecture & Design: Participating in the research, system design, and implementation of architectural decisions into production code.
- Diagnose bugs, analyse technical limitations, and deliver effective fixes independently. Provide on-call support for production incidents.
- Document and maintain detailed records of support incidents, solutions provided, and knowledge base articles for future reference.
- Cross-functional Collaboration: Interacting with product managers, QA testers, and stakeholders to clarify requirements and ensure timely project delivery.
- Mentorship & Leadership: Guiding junior developers on the team and assisting colleagues when technical hurdles arise.
- Integrated companies' custom ERP systems with SAP and third-party finance software through API middleware, eliminating manual data entry, Email Service etc.
- Engineered seamless cross platform integrations to optimise data flow and operational workflows.
- Enabled full CRUD operations through standardised HTTP methods (GET, POST, PUT, DELETE).
- **Synchronised biometric attendance systems (ZKTeco, eSSL, eSSL BioTime, Matrix Comsec COSEC) with the ERP for real time data updates.**
- Designed dynamic dashboards with live graphs and analytics, alongside automated PDF (print ready) and Excel report generation.
- Automated generation of business-critical documents such as invoices and quotations directly from the ERP.
- Customised bank cheque printing per cheque leaf format and client requirement.
- Streamlined approval workflows for finance and procurement teams via seamless export to PDF and print ready formats.
- Led client demonstrations, requirement gathering sessions and task distribution across the development team.
- Contributed to architecture design and implementation of a CAFM project.
- Co-authored project documentation including SRS, SDD, system architecture diagrams and Figma UI / UX prototypes.
- Designed and implemented database schemas for new modules, ensuring scalability, consistency and optimal performance.
- Manage projects from initial planning through installation, testing, and final handover
- Requirements gathering, functional documentation, UAT & testing experience

- Write and optimise stored procedures and database queries for maximum performance
- Allocates projects according to workload, expertise, and deadlines, ensuring effective coordination between product, visualization, and technical design disciplines.
- Build and maintain secure SOAP and REST API.

Juego Studios, Bengaluru, India

Software Engineer, Unity3D Game Developer

July 2016 to August 2017

- Developed mobile games for Android and iOS using Unity3D and C#, including Zappy IEEE, Jigsaw Puzzles and Mission Ludo.
- Integrated Amazon Analytics, push notifications and in app purchases (IAP).
- Collaborated with United States based clients on UI design, testing and agile delivery.

Juego Studios, Bengaluru, India

Intern and Trainee

January 2016 to May 2016

- Assisted across game development workflows including coding, design and testing, and delivered MCA academic project.

KEY PROJECTS

Sales Realization. *VB.NET, MySQL.* Automated invoice generation, stock management and billing for retail.

Malabar Tourism Portal. *PHP, MySQL.* Tourism booking platform for Kerala's Malabar region.

Regional Transport Office (RTO) System. *.NET, MySQL.* Digitised driving licence and vehicle registration workflows.

Machine Simulation Training. *Unity3D.* Three dimensional simulation system for mechanical engineering training.

EDUCATION

Sahyadri Institute of Technology, Mangaluru
(2014 to 2016)

Master of Computer Applications (MCA)
Aggregate score 74.99 percent

St. Aloysius College, Mangaluru (2010 to 2013)

Bachelor of Computer Applications (BCA)
Aggregate score 69.02 percent

LANGUAGES

English | Hindi | Malayalam | Tamil | Kannada
